CALGARY, October 3.

The fall fair began here last Thursday. The exhibits were not numerous, but there was a good show of horses and cattle and the quality of the other exhibits was good. The base ball game between Calgary and Edmonton resulted in a victory for the former by 8 to 0. In the cricket match Calgary was again successful, and the lacrosse match was won by Calgary taking four stais. Edmonton, however, got even in the foot race between Tarrant and the Indian, Moosewa. Over \$1,000 was put up on the race and most of it went into the pockets of the northern visitors, as the Indian won with the greatest ease. A banquet was given to the Edmonton boys on Friday night by the Calgary clubs, at which there were over 100 present and a most pleasant time was spent.

A PRAIRIE fire occurred yesterday north of town and a little south of the Sturgeon river settlement. It required the efforts of about twenty men to prevent it from burning W. Whitely's stacks and buildings. The fire is supposed to have been started accidentally by a shooting party.

THE survey parties of Messrs. Miles, Hubbel, Gibbons and St. Cyr, who have been engaged in re-staking old surveys in township 50 passed through town on Friday on the way to Fort Saskatchewan to work in township 54.

THE Calgary Herald calls attention to the fact that cholera has broken out in Yokohama, Japan, and points out the necessity of an efficient quarantine at the Pacific end of the C. P. R. The Herald has before spoken of this necessity and should be supported in its stand by the press of the Northwest.

MR. FOX, of Des Moines, Iowa, who visited Edmonton a week or two ago as a delegate, with Jas. Reilly, of Calgary, told the Tribune of that place that the blue joint grass of Edmonton was identical with the far famed blue grass of Kentucky. It was not quite so thick—that is so universally distributed—but was of excellent quality. Its blue grass is the boast of Kentucky, and to the presence of that grass is said to be due to a great extent the superiority of the horses of that state. With the Kentucky specialty on the Saskatchewan and other conditions being more favorable this district should realize the highest hopes of its horse men as a field for raising good horses. This is the country, and don't forget it.

THE Toronto Weekly Empire issues an excellent prize supplement plate in which appear all the conservative members of the House of Commons. As the plate is produced by the photo engraving process it can be relied upon as being true to life, and is a sample of the best that can be done by that form of art. The premier, the members of his cabinet and the speaker are given special prominence. Each person is numbered and an index at the foot of the engraving makes it very easy to get the name or portrait of any one in the group. The Northwest members are easily distinguishable. Mr. Dewdney looks as handsome as he always does in or out of a picture; Mr. Davis is rather flattered; while Messrs. Macdowall and Davin are apparently taken at a disadvantage, neither looking at his best, but, of course, easily recognizable. Both as a work of art and as a matter of information on current politics—which is live history—this plate is well worth the subscription price of the Weekly Empire, \$1 a year.

STONY PLAIN RESERVE.

THE Free Press of a recent issue has an article on the Stony Plain Indian reserve, in which the writer, Hon. Freeman Talbot, says: "On Tuesday last I visited the Stony Plain Indian reservation. It is about sixteen miles west from Edmonton, situated on Sandy lake, a body of water some two miles by half a mile wide. The lake is beautiful, with small islands clothed with rich grass, shrubs, small fruit trees and some stately spruce. The reservation is an extensive one, thirty-two thousand acres of as rich prairie land as the most fastidious agriculturist could wish for. There are some tall groves of poplar on this reservation, adding to its great beauty. Eight hundred acres of this tract is in a high state of cultivation, and the crops are all good, some excellent. Wheat, barley, oats, peas, buckwheat, Indian corn, tobacco, hemp, flax and potatoes have all matured well this season. And how long the vegetables in the garden may continue to grow, I cannot say, but on Thursday last, 15th September, potatoes, beans and vines were green and untouched by frost. Almost all kinds of vegetables and all of more than an average quality I found in the garden, but some articles must have special notice. The champion of England peas and the marrow fat were the best and the most prolific that I ever examined and I have cultivated and assisted to cultivate peas for more than 70 years. Of the red cabbage I had intended to say nothing, lest those that wish to depreciate this cold northern country might say as they have said of some Dakota delegates, "they were paid to lie," but I was reminded by the agent, Count De Cazes. He will wager \$300 that he has in the Stony Plains garden the reddest, the hardest and the biggest red cabbage in America, and I am satisfied he is right. The celery is quite equal to the best I have seen this season. Tomatoes, squash, pumpkin and tobacco have all made as good a growth as in the best garden six hundred miles south of Edmonton. Wines in barrels, in casks and in bottles, were shown us, all made from the wild fruits that in this sunny mild climate are found in great abundance in all the slightly timbered district."

EDMONTON BULLETIN, OCTOBER 3, 1892

THE RUSH.

Whatever opinions may have been held in past years as to the benefits which the advent of railways would confer upon this district, there are no two opinions now that the coming of the road has been of very great benefit, both in general and in particular. Before the road came it was feared by many that prices would go down, that business would be overdone, that labor would be less well paid, that money would be drained out of the country, and that, in fact, the advent of the railway meant the commencement of hard times. This has been the experience of many an old established place. Old methods were done away with by the railway, and either the people or the country were not adapted to the new methods which it brought in. Happily no such complaint can be made in the case of Edmonton. The railway came at a time when a change in methods had to be made in any case. Production had reached a limit beyond which it could not profitably pass, and stagnation must have resulted unless the railway came. Now that the railway has come, and ever since it came, progress has been the word on every hand and in all lines. An unlimited and profitable outside market has been found for beef, dairy products, vegetables, oats, barley and wheat. The natural result is a feeling of confidence on the part of the farmers and business men, which has extended throughout the whole range of their connection and influence. People coming over the railway have found an attractive country and a confident and energetic people. They have been favorably impressed by both as they would not have been if they had found the country ever so attractive and the people despondent, or the people talking ever so loudly if the country did not give plain proof of the truth of their assertions; and as a consequence hundreds have already decided to cast in their lot with us and thousands have expressed their intention of doing so. This again has given us another push forward and has been a most powerful influence in assisting the general prosperity which now exists. This desire of outsiders to come in has for the first time given an actual negotiable value to the land which almost every one held in greater or lesser quantity. This value given to the land is an actual addition to the wealth of the district, to the amount of from two to five dollars for each acre of occupied land. This is wealth as surely as if were cash in the bank, and is only the beginning of what will be as the increase of population which has now commenced, continues from year to year, as the knowledge of this district and its advantages becomes more and more widely spread. Every man in the district who owns any land has a direct financial interest in anything and everything that will promote settlement and increase population and production. What has occurred in this direction in the past year is certainly very satisfactory—quite equal to reasonable expectations—but it is only the beginning of what will be as the great Saskatchewan valley fills with people, and other towns and settlements are established along its banks, for the 500 fertile miles which extend from Edmonton to Prince

Albert and beyond, every one of which will be a customer for Edmonton coal and lumber and other manufactures.

R. B. GORDON,
Clerk Executive Committee**BY-LAW NO. 29.**

A by-law to provide for borrowing the sum of \$10,000.00 upon the credit of the Municipality.

Whereas it is expedient that there should be raised by the Municipality of the town of Edmonton the sum of \$10,000.00 to enable the Municipality to repay certain amounts temporarily borrowed for the purchase of certain lands and fire apparatus required for the use of the Municipality and for other like purposes of permanent benefit to the Municipality; and also to enable the Municipality to borrow further sums which it is expedient to expend for the purpose of erecting a fire hall and for other like purposes of permanent benefit to the Municipality.

And whereas the amount of the existing debt of the Municipality, other than for current expenses, is \$17,862.49 (incurred in respect of local and permanent improvements) and \$138.50 for interest thereon making together \$18,000.99 whereof no part is in arrear.

The Macleod Gazette reports a rich find of quartz showing \$40 in silver, \$2.70 in gold and \$2.07 in copper, in the Kootenay lake country in the Rocky mountains, near the United States boundary.

The new Roman Catholic hospital in Calgary has treated 123 patients since April 1891, of whom 49 were Roman Catholic, 30 Church of England, 22 Presbyterian, 14 Methodist, 5 Lutheran and 3 Baptist. Only five cases proved fatal. The charges are \$1 a day to those who can afford to pay, and up to the present time only 44 patients of the whole number treated have paid these very moderate charges.

Premier Cayley is out with a letter explaining in reply to Senator Perley that he did not have to resign on account of the failure of his party to elect a speaker nominated by him. Mr. Cayley says: "If it was our duty to elect a speaker, we should have done so, and failing in that should have resigned." Mr. Cayley's explanation (?) fills two columns of the Regina Leader. It amounts to this: That according to practice in the Dominion House of Commons if Mr. Cayley had proposed the speaker in his capacity of "premier" and his nomination been defeated he would have been bound to resign; but that having made the nomination only in his capacity of a private member—several days after he had announced himself leader of the executive and therefore of the house—he was not bound to resign. This is a fair sample of the style of argument which the gentleman of the "Byronic countenance"—to quote the Regina Leader—in his less abusive moments, puts forth as reasoning. The point is that Mr. Cayley, by accepting the leadership, assumed responsibility for the control of the house. The vote on the speakership showed that he did not and could not control the house. Therefore he should have resigned. Not because Bourinot or May do not say he was required to elect a speaker, but because he clearly did not command the confidence of a majority of the house, the first necessity for the leader of the house.

GENERAL NEWS.

Scarlet fever is on the increase in Winnipeg. In 1891 the assessed valuation was \$89,000,000; this year it is \$44,000,000.

The Battleford Herald reports several cases of miasmatic fever in that town and in the police barracks.

The Sultana gold mine, at Lake of the Woods, has been sold for \$125,000 to a company of English and United States capitalists.

THE town of Calgary pays the waterworks company 25c for 1,000 gallons of water under the new arrangement. This is cheaper than the Edmonton waterworks.

ALBERTA EXHIBITS.

Returns regarding the Territorial exhibit at the Toronto fair are still coming in. The latest is the Mail report which appears in full in the Calgary Herald. Edmonton is mentioned once as producing soft coal at \$2 a ton, and that is all. In speaking of agricultural products, mention of any of them having come from Edmonton is carefully omitted, and the idea is attempted to be conveyed that they are the products of the ranch country. In proof of which the following extract is given:

"In another part of the exhibit twenty kinds of native and indigenous grasses are shown varying in length from three to ten feet. Also wild pea vine and vetch, the richest and most nutritious food for cattle nature provides. This accounts for the superior quality of beef grown in the Alberta district, which is the grazing and ranching centre of the Northwest. Dairying and cheesemaking is also one of the leading industries of this twice blessed territory which enjoys only one month of winter, and the rest of the year perpetual spring. Samples of barley and oats, grown in the district, are also shown, which proves how suitable Alberta is for husbandry. Roots and vegetables are also exhibited, which virtually amaze the visitors. The roots exhibited were dug up early in the season for exhibition purposes, and have not fully matured yet. They give a fair idea of the possibilities of market gardening in the banner province of the Northwest, the richness of its soil, and the salubrity of its climate."

The stranger who would expect to find grass three to ten feet in length and wild pea vine and vetch as well growing on the grazing grounds around Calgary, as he naturally would from this report, would certainly be disappointed, and would certainly vote the exhibit and report an amalgamated swindle; just as he would if he undertook to use a wagon all the year round at Edmonton, as another part of the report informs him is the rule in Alberta. It is clearly evident from the reports appearing in the three leading papers of Canada, the Mail, Globe and Empire, that the very energetic and competent gentlemen who accompanied the Territorial exhibit have been very much more interested in booming their own particular localities than in letting the thousands who attended the exhibition know just what special attractions each section of the Northwest has to offer. This is not good business and should not be countenanced by the C. P. R.

It is expected that the grading of the new road into the Crow's Nest Pass will be completed within two or three weeks. Gangs of graders are scattered along the road for over eighty miles, and into the mouth of the pass. Grading will not pass that point, and no iron will be laid this year. On the completion of the grading, the C. & E. officials in charge of the construction of stores, etc., will leave for Winnipeg with the outfits.

The Medicine Hat Times complains of the number of dismissals of men from the C. P. R. service there. The Times says: "Reinstatement without prejudice after the strike appears to have a different meaning here than at any other division of this great road."
